THE RIDER TUFF TIRE CART

Designed for efficiency, productivity and worker safety

Model # CB-MSTWD

Increase your productivity when changing heavy truck tires and wheel assemblies, with the new ergonomic and safe truck wheel Dolly. Its two solid casters make it easy to maneuver and support truck tires thus, reducing back injuries and damages to rims.

Ideal for service trucks, fleet or your daily workshop, the CB-MSTWD will ease the positioning of your tire/wheel assemblies onto the hub with its two rollers that allow a 360° rotation.

Rethink how you handle tires. Supporting tires of up to 48”/1219 mm OD or up to 275 lb/125 kg the dolly will improve your daily work quality and well-being.

Remove tire/wheel assembly from the vehicle:

1. Make sure the vehicle is safely supported by a jack stand and that the lug nuts are removed.
2. Roll the dolly under the slightly lifted tire.
3. Lift the tire/wheel assembly with one hand on the Truck Wheel Dolly and one hand on the tire.
4. Pull and roll the dolly and tire/wheel assembly away from the vehicle.

Install tire/wheel assembly on the vehicle:

1. Make sure the tire/wheel assembly is positioned properly on the dolly.
2. Roll towards the vehicle.
3. Lift tire/wheel assembly with the Truck Wheel Dolly.
4. Line up the holes of the rim with the studs on the hub and install tire/wheel.
5. Remove dolly from under the tire.
