

TYPE I SAFETY CONTAINERS FOR FLAMMABLES

Type I Safety cans are easy to fill and easy to use. The economical choice for flammables

Type I Safety cans are designed with a single spout for filling and pouring. The self closing, leakproof lid controls vapours and provides security from spills and leaks. Unique counterbalanced design handle offers gravity assisted pouring. Larger capacity (over 1 gal) feature a swinging rounded handle that greatly eases carrying heavier loads. Heavy duty high grade coated, lead free steel construction with reinforcing ribs to strengthen side walls for extra "bumper guard" protection.

TYPE II SAFETY CONTAINERS FOR FLAMMABLES

The worlds most trusted brand for safety containers and containment systems

Compliant Type II safety cans with lead free coated steel offer the convenience of two openings on the top. One is equipped with a flexible metal hose for smooth accurate pouring into small apertures, the other is used for filling the can. All Type II cans have a swinging handle to ease carrying a full, heavy can. The unique design uses the weight of the liquid to counterbalance the pressure required to open the spout when pouring.

OILY WASTE CANS

Dispose of Oil-Soaked rags and protect your facility from fires that can start from Spontaneous combustion, Sparks or Careless use of Smoking Material

OSHA compliant oily waste cans are essential whenever solvent soaked cloths and wiping rags are used. The specially designed lip opens n more than 60 degrees and stays closed when not in use, isolating contents from potential fire sources. Round construction and elevated bottom encourage circulation of air around the can to disperse heat and reduce moisture builup and rusting
