## TIRE PUCK DOLLY

### Practical, stackable, space saver, safe

### Model # **CB-MCTP**

From your tire conveyor, tire racks or displays directly onto the tire puck dolly, you will easily move your tires/wheels.

- No more loose wheels or tires on the floor.
- Stack them up for storage or display

The 300 lb / 165 kg allow technicians to use it as a wheel dismounting or tire rotation station. Four swivels casters with one equipped with a brake and a solid UV resistant frame makes the Tire Puck perfect to use as a display in your drive-thru or outside. The Canuck Tire Puck can also be manoeuvred with stacked tires with one of our CB-MTC tire carts. This all-in-one Puck will prevent injuries and accidents from tire handling.
