OPTIONAL LASER ALIGNMENT VISOR

The OPT-5560 laser Alignment visor is an optional accessory to take the place of the conventional alignment visor on the OPT-5405 Optical headlight Aimer.

The laser Alignment visor is calibrated to the optical head of the aimer and when turned on, projects a horizontal laser light across the front of the vehicle.

This simple addition to the headlight aimer make the job of aimer alignment to the vehicle easier, but greatly speeds up the process and makes the technician more productive.

Model # **OPT-5560**
